

## RH Petrogas subsidiary receives National Nature Conservation Award in Indonesia

**4 September 2024** – RH Petrogas Limited (and together with its subsidiaries, the “**Group**”), is pleased to announce that its 82.65% owned subsidiary Petrogas (Basin) Ltd. (“**PBL**”) was conferred the National Nature Conservation Award by the Ministry of Environment and Forestry of the Republic of Indonesia. The award is in recognition of PBL’s contributions to supporting orchid species conservation, community empowerment, and nature conservation campaigns in Sorong Nature Park (Taman Wisata Alam), Southwest Papua.

The award was presented by Mrs. Prof. Dr. Ir. Siti Nurbaya Bakar, M.Sc, the Minister of Environment and Forestry of the Republic of Indonesia, to Mr. Syafri Syafar, President of RH Petrogas Companies in Indonesia, in an award ceremony at the 2024 National Nature Conservation Day Summit, held in Boyolali, Central Java.

PBL has been contributing to the in-situ conservation efforts in Sorong Nature Park under a cooperation agreement signed with the West Papua Natural Resources Conservation Center. The agreement aimed to promote orchid species conservation, community empowerment and conservation campaigns. Programmes conducted by PBL at the park included the construction of orchid houses, provision of equipment, and buildup of public infrastructure such as walking paths and other facilities.

Through these conservation activities, the native Moi Tribe was also engaged to participate in important events held at the park. The tribe performed traditional ceremonial rituals and provided their traditional cuisine during these events, which were attended by government dignitaries.

Mr. Francis Chang, Group CEO and Executive Director, commented, “Southwest Papua is an area rich in plant and animal life. We are conscious of this and aim to minimise our environmental impact where possible. These conservation efforts are our contribution to ensuring that ecosystems and biodiversity continue to thrive in the areas where we operate.”

Besides PBL’s conservation efforts within Sorong Nature Park, other conservation initiatives include the setting up of the Arar Conservation Center, which houses its own orchid conservation area as well as a nursery for plant seedlings native to the region. Additionally, the center promotes the conservation of two indigenous species – the Timor deer and the Black king (Palm) cockatoo, which are respectively classified as vulnerable and near-threatened species.
